CAREER OBJECTIVE

Results-oriented Data Engineer with a strong foundation in data analysis and programming, seeking a challenging role that integrates expertise in both engineering and analytics. Skilled in designing and implementing scalable data pipelines, optimizing storage solutions, and ensuring data integrity. Proficient in programming languages such as Python, SQL, and JavaScript, with experience in building APIs, automating ETL workflows, and leveraging cloud platforms. Adept in advanced analytics, statistical modelling, and data visualization to deliver actionable insights. Dedicated to driving data-informed decision-making and solving complex business problems in collaborative, dynamic environments. Committed to continuous learning and staying at the forefront of emerging technologies to enhance organizational success and team performance.

SKILLS AND ATTRIBUTES

Language Skills:
Fluent in English, Mandarin and Cantonese.

Technical Skills:

- SQL
- R
- Python
- Alteryx
- Qlik Sense
- Power BI
- Boomi
- Google Cloud Platform

KEY COMPETENCIES

Customer Service:
Skilled in engaging with customers and stakeholders across all management levels, ensuring clear communication and successful outcomes.

Administration:
Possessing a broad skillset including data entry, reporting, interpreting and analysing data, managing correspondence; and coordinating and prioritising all to a high standard.

Team Collaboration:
Strong team player with the ability to build and foster relationships across diverse teams. Supported colleagues in skill development and achieving organizational goals, demonstrated during international campaign coordination.

Communication:
Proven track record of using high level, tailored communication techniques (including verbal and written), demonstrated interpersonal, leadership and stakeholder management skills when liaising with different levels with an organisation located internationally.

Problem Solving:
Analytical thinker with a methodical approach to resolving complex queries. Skilled in collaborating with internal and external partners to identify efficient, high-quality solutions

Planning and Organising:
Demonstrated ability to balance multiple priorities, meet deadlines, and deliver outputs under pressure. Successfully managed competing timelines as both Campaign Coordinator and Data Consultant.

Analytical Ability:
Proficient in producing accurate, high-quality work under tight deadlines. Experienced in complex data collection, cleaning, and transformation using Python, SQL and internal tools, with a focus on actionable insights.

PROFESSIONAL EXPERIENCE

DATA ACQUISITION AGENT, SELLING SIMPLIFIED AU
May 2020 – April 2021

- Utilized HTML and Python to extract data from business directories, networking portals and company websites, ensuring up-to-date information retrieval.
- Conducted data cleaning and updating by executing SQL queries on databases, ensuring data integrity and quality.
- Maintained effective communication and channels with customer support and operation teams in Australia and overseas.
- Additionally, performed the role of Campaign Operation Coordinator, overseeing 10+ campaigns per week, each running between 2-6 weeks. Responsibilities included data sourcing, processing, validation, analysis and delivery.
- Contributed to a B2B company monitoring, refreshing and enriching over 100M global B2B records, utilizing various interfaces such as Visonayr, FileZilla and integrate based on campaign requirements.

DATA SOLUTIONS SPECIALIST, AVERY DENNISON HK
Jun 2021 – May 2022

- Project-based management across global locations, ensuring successful delivery within specified timelines
- Investigated and resolved customer and production issues by effectively utilizing various systems
- Prepare project plan outlining functional and data requirements for program design, schedule and implementation
- Build and maintain data structure and production information of system
- Provide detailed analysis for variable data products and online ordering solutions
- Collaborated with cross-functional teams, including Operation teams, Commercial and Internal Product Development team, to achieve project objectives and deliver exceptional results.

SOURCING DATA ANALYST, HH GLOBAL HK
Jun 2022 – Apr 2023

- Conducted quantitative analysis of product sourcing data within the APAC to identify opportunities for improvement
- Utilized Python and R to interpret and transform data, and presented findings through Power BI to drive focus and provide actionable insights

Winnie Choy

61921730

choywingyee0922@gmail.com

- Support local Category managers in developing new suppliers and sourcing strategies
- Developed rate cards, establishing fixed price agreements with suppliers.
- Took responsibility of pricing new opportunities involving print and POSM procurement, supporting the business development's team in bid preparation.

DATA CONSULTANT, NCS NEXT HK

Apr 2023 – Present

Participate in client working session to discover business strategy and objectives.

AI Engineer – Global Telecommunications Company (Singapore, 3 months)

- Designed and implemented AIOps backend API using FastAPI and Python.
- Integrated with ServiceNow to process incident alerts via AI pipeline.
- Delivered automated incident summaries to Microsoft Teams

Data Engineer – Government Based Department (2 years)

Data Injection Project:

- Led the end-to-end design and integration workflows.
- Conducted data extraction, transformation and load using Google Cloud Platform
- Implemented functionality requirements, logging, and email alerts.
- Leveraged GCP services such as Cloud Function, Secret Manager, Pub/Sub, and Cloud Scheduler.

Data Extraction Project:

- Performed data extraction, transformation, and loading operations using Boomi.
- Developed a solution to establish a listener in Boomi and load data into Big Query.
- Collaborated with external vendors to implement an API post method for sending JSON data in various formats to the Boomi listener.
- Design API endpoints for request validation, response generation.
- Validated the payload, mapped SQL scripts to the desired Big Query input, and successfully loaded the data into Big Query.

Data Engineer – Global IT Services Company (3 months)

- Developed Alteryx workflow to fulfil client's requirements.
- Extracted and transformed Salesforce data with Python and Alteryx, loading into Microsoft SQL Server.
- Built interactive Power BI dashboards for product marketing analysis.

Data Analyst – Global International Trade Company (6 months)

- Communicated with HR team to gather requirement and provide support for routine report analysis.
- Automated data extraction and transformation with Alteryx and bulk loaded into Snowflake for integration
- Designed Qlik Sense SaaS dashboards for workforce insights, including staff turnover and leave utilization
